ABSTRACT

This report provides annual information for the 1998-99 school year on grade-level retention in the Texas public school system, based on the Public Education Information Management System. Data on retention are provided by grade, ethnicity, gender, participation in special education, degree of English proficiency, and socioeconomic status. In 1998-99, 170,534 K-12 students were retained in grade for an overall retention rate of 4.7 percent. Grade 9 had the highest retention rate overall, and grade 1 had the highest retention rate at the elementary level. Males were retained at higher rates than females, across years and grade levels. Hispanic and African American students were retained at higher rates than white students. Economically disadvantaged students were retained at higher rates than students who were not economically disadvantaged. Districts in urban areas and charter schools had the highest retention rates. In 1998-99, retention rates were higher among districts and campuses with larger percentages of minority students and lower percentages of students passing the Texas Assessment of Academic Skills. Four appendixes, which make up the bulk of the report, present data on grade level retention by grade and ethnicity; grade level retention by district characteristic; grade level retention by campus characteristics; and grade level retention by district and grade. Highlights

How extensive was grade-level retention in Texas?

- In 1998-99, a total of 170,534 students in kindergarten through Grade 12 were retained in grade, for an overall retention rate of 4.7 percent.
- Across all grades, Grade 9 had the highest retention rate (18.8%).
- At the elementary level, Grade 1 had the highest retention rate (6.5%) and Grade 3 showed the greatest percentage increase.

Who was retained?

- Males were retained at a higher rate than females, across years and grade levels.
- Hispanic and African American students were retained at higher rates than White students.
- Economically disadvantaged students were retained at a higher rate than students who were not economically disadvantaged.

Where were they retained?

- Districts in urban areas and charter schools had the highest retention rates.
- In 1998-99, retention rates were higher among districts and campuses with larger percentages of minority students and lower percentages of students passing the Texas Assessment of Academic Skills.

Introduction

In compliance with Texas Education Code (TEC) §39.182, the Texas Education Agency (TEA) prepares an annual report on grade-level retention in the Texas public school system. Grade-level retention is typically defined as delayed entry of a child who is of appropriate chronological age but not developmentally ready or mature enough to enter school, or repetition of a grade a student was unable to complete successfully (Shepard, 1989). The primary goal of retention is to give a student a year to mature or master the academic tasks of one grade level before advancing to the next.

This report presents information on grade-level retention for the 1998-99 school year. For purposes of comparison, data on retention for 1994-95 through 1998-99 are included. Breakdowns are provided by grade, ethnicity, gender, participation in special education, degree of English proficiency, and socioeconomic status.

The report will provide the legislature, TEA, and educators with background for reviewing current and future policies related to grade-level retention. Senate Bill 4 added TEC §28.0211 in 1999. This new statute phases in a process of enrolling students who fail the Texas Assessment of Academic Skills (TAAS) at Grades 3, 5, and 8 in accelerated instruction. This becomes effective: in 2002-03 for Grade 3; in 2004-05 for Grade 5; and in 2007-08 for Grade 8. Accelerated instruction is designed to ensure that students acquire the skills needed to continue with their classmates. Strategies such as after-school programs, individual tutoring, and summer school are proposed as first responses to TAAS failure. Reading academies are also being established to concentrate assistance in this subject. Students at these grade levels will be given three opportunities to take and pass the TAAS for their grade. The intent of the law is that grade-level retention should be the avenue of last resort. Monitoring and reporting of retention rates will be central to efforts to gauge the effects of these new policies over time.

Methods

Data Source

The Public Education Information Management System (PEIMS) includes data on the grade levels of all students in the Texas public school system (TEC §29.083). Data regarding student characteristics and program participation are also available in PEIMS.

Identifying Grade-level Retention

To determine the number and percentage of students retained in grade, October enrollment data were compared to attendance in the final, six-week period of the previous school year. Students who dropped or migrated out of the Texas public school system after the first year were excluded from the total student count, as were students new to the system in the second year. Students who enrolled both years or graduated were included in the total student count. Students found to have been enrolled in the same grade in both years were counted as retained. The retention rate was calculated by dividing the number of students retained by the total student count.

Through the 1997-98 school year, the retention calculations included only students who were enrolled on the last Friday in October. Beginning in 1998-99, additional enrollment data for Grades 7-12 were collected for calculation of the secondary school dropout and completion rates. This collection expanded enrollment to all students in Grades 7-12 enrolled at any time during the fall. The change in the retention calculation allowed more secondary school students to be included and made the calculation of the retention rate more similar to that of TEA's secondary school dropout rate and completion rate. Expanded enrollment data were not collected for Grades K-6, so enrollment counts for Grades K-6 were unchanged. In order to include similar data for Grades K-6, retention reporting would have been delayed a year.

Grade-level Retention of Students

Number of Students Retained

Of the total number of Texas public school students reported in kindergarten through Grade 12 in the 1998-99 school year, 4.7 percent (170,534 students) were retained in grade (Table 1). In the four years prior to the change in retention calculation, there were slight fluctuations in the retention rate; it remained between 4.0 and 4.3 percent. The absolute number of students retained increased each year, as did the number of students enrolled in Texas public schools (TEA, 1999).

**Table 1. Grade-level Retention by Student Groups,
Texas Public Schools, 1998-99**

Student Group	Number Retained	Number of Students	Rate, %
African American	32,221	507,292	6.4
Asian/Pacific Islander	2,041	91,246	2.2
Hispanic	88,820	1,373,296	6.5
Native American	509	10,450	4.9
White	46,943	1,624,649	2.9
Economically Disadvantaged	94,623	1,627,838	5.8
Female	66,075	1,760,202	3.8
Male	104,459	1,846,731	5.7
All Students ^a	170,534	3,606,933	4.7

^aStudents whose enrollment records matched in successive school years, plus graduates

Grade-level Retention by Ethnicity

Hispanic and African American students were retained at average rates over twice that of White students (Figure 1). In 1998-99, for example, 2.9 percent of White students were retained in

grade, compared to 6.5 percent of Hispanic students and 6.4 percent of African American students.

Minority students were over-represented among retained students. About 5 out of 10 students enrolled in Texas public schools were Hispanic or African American. Nevertheless, about 7 out of 10 students retained in Texas public schools were from one of these two ethnic groups. Hispanic students had the largest number of students retained, followed by White students. Appendix A summarizes grade-level retention for school years 1994-95 through 1998-99. The tables list the number and percentage of students retained in each grade by ethnic group.

Figure 1. Grade-level Retention by Ethnicity, Texas Public Schools, 1998-99

Grade-level Retention by Gender

In 1998-99, the retention rate for females was 3.8 percent, and the rate for males was 5.7 percent. Males were more likely than females to be retained in each grade, ethnic group, and year. Male students made up 61 percent of all students retained.

Grade-level Retention by Grade

The percentage of students retained varied markedly by grade (Figure 2). Students in ninth grade had the highest average retention rate and students in fifth grade had the lowest average retention rate.

At the elementary level, the highest average retention rate was found in first grade. In 1996-97, the retention rate for this grade level (5.6%) was at its lowest in five years (Table 2). However, in 1998-99, retention among first graders climbed to its highest rate (6.5%) since 1994-95. Hispanic and African American students had the highest retention rates among all ethnic groups in Grade 1.

The largest percentage increase from 1997-98 to 1998-99 in retention rates among elementary students was found in the third grade (Appendix A, Table A-1). In 1998-99, the average retention rates for Hispanic and African American third graders increased by 0.7 and 1.2 percentage points, respectively.

Figure 2. Grade-level Retention by Grade, Texas Public Schools, 1998-99

In 1998-99, 18.8 percent of Grade 9 students (59,738) were retained (Figure 3). Nearly one out of five Grade 9 students repeated the grade. As in Grade 1, disproportionately larger percentages of Hispanic and African American students were retained in Grade 9. Even in terms of absolute numbers, more than twice as many Hispanic students as White students were retained in ninth grade in 1998-99. Approximately one-fourth of all African American and Hispanic ninth graders were retained.

Table 2. Grade-level Retention, First Grade, by Ethnicity, Texas Public Schools, 1994-95 Through 1998-99

Year	African American		Asian/ Pacific Islander		Hispanic		Native American		White		All Students	
	Number	Rate, %	Number	Rate, %	Number	Rate, %	Number	Rate, %	Number	Rate, %	Number	Rate, %

Figure 3. Grade-level Retention by Ethnicity, Grade 9, Texas Public Schools, 1998-99

Students Receiving Special Education Services

The average retention rate for students who participated in special education programs was compared to the average rate for those who did not (Table 3). Each student in a special education program has an individual education plan (IEP) that specifies goals and objectives for the year. The student progresses to the next grade level whenever these goals are met. It is important to note that retention and promotion policies and practices for disabling conditions varied across districts.

A disproportionately large percentage of students participating in special education (7.0%) were retained, compared to students not participating (4.4%). Because students who met their IEP goals during the year were promoted when they met their goals (not necessarily at the end of the school year), the retention rate for students participating in special education may be slightly inflated.

Table 3. Grade-level Retention by Special Education Status, Texas Public Schools, 1998-99

	Receiving Special Education Services	Not Receiving Special Education Services
Number Retained	34,073	136,461
Number of Students	483,697	3,123,236
Retention Rate, %	7.0	4.4

Students With Limited English Proficiency

Students with limited English proficiency (LEP) are learning English at the same time they are learning reading and other language arts skills. Reading and language problems have been shown to be highly correlated with retention in the elementary grades (Kaczala, 1991; Marcon, 1993). Depending on their levels of English skills, most LEP students are enrolled in bilingual or English as a second language (ESL) programs (TEC §29.053). LEP students participating in special education receive bilingual or ESL services as part of their special education programs. While parents may request that a child not receive special language services, in 1998-99, 92 percent of LEP students participated in bilingual or ESL programs.

Table 4. Grade-level Retention by Limited English Proficient (LEP) Status and Services Received, Texas Public Schools, 1994-95 Through 1998-99

Grades	Year	Services Received by Retained LEP Students								All Non-LEP Students			
		Bilingual		ESL ^a		Special Education		No Services ^b		All LEP Students		Students

^aEnglish as a second language. ^bIncluding students whose parents requested the student not be served by a special language program.

^cBeginning in 1998-99, the retention calculations for Grades 7-12 changed to include all students enrolled at any time during the fall. Because of this change, 1998-99 data are not comparable to data for earlier years.

The retention rates for both elementary- and secondary-grade LEP students were consistently higher than the rates for other elementary- and secondary-grade students (Table 4). LEP students in the elementary grades had similar retention rates whether they were participating in bilingual or ESL programs. At the secondary level, the retention rates for LEP students receiving ESL (13.4%) or special education services (13.5%) and LEP students not receiving services (12.4%) were notably higher than the rate for non-LEP students (7.0%). Students receiving bilingual services had the lowest retention (5.8%) compared to other LEP students and all other students. Nevertheless, it should be noted that this group had a relatively low number of students participating.

Students Who Were Economically Disadvantaged

Between 1994-95 and 1998-99, the average retention rate for students identified as economically disadvantaged was consistently higher than the rate for other students (Table 5). Each year, economically disadvantaged students represented higher proportions of both the total number of students enrolled for two consecutive years and the total retained in Texas public schools. In 1998-99, 45.1 percent of students overall and 55.5 percent of retained students were identified as economically disadvantaged.

**Table 5. Grade-level Retention by Socioeconomic Status,
Texas Public Schools, 1998-99**

	Economically Disadvantaged	Not Economically Disadvantaged
Number of Students	1,627,838	1,979,095
Number Retained	94,623	75,911
Retention Rate, %	5.8	3.8

District and Campus Characteristics

Texas school districts differ considerably in community type, size, student performance, and expenditures. Retention rates in districts across these categories tend to differ as well (Appendix B).

Aside from charters (22.0%), districts in urban areas (6.9%) had the highest average retention rate in 1998-99. Higher retention rates were generally associated with districts that had higher percentages of minority students, higher percentages of economically disadvantaged students, larger percentages of minority teachers, and lower percentages of students passing the TAAS. As might be expected, many of these characteristics were typical of districts classified as urban.

Higher retention rates were associated with campuses that had characteristics similar to those of districts with higher retention rates (Appendix C). One exception was the percentage of students identified as economically disadvantaged at the campus level.

Appendix D contains the district retention rates by grade for each district in Texas in 1998-99.

Conclusions

In 1998-99, the number of students retained was 170,534 (4.7%). Retention appears to have affected minority populations disproportionately: approximately 7 out of 10 students retained were Hispanic or African American. In 1998-99, 2.9 percent of White students were retained in grade; compared to 6.4 percent and 6.5 percent for African American and Hispanic students, respectively.

By far, the highest rate of grade-level retention was in the ninth grade, where almost one out of five students was repeating that grade. At the elementary level, retention occurred most frequently in the first grade, but third grade showed the greatest percentage increase in retention over the previous year.

Consistent gender differences were evident in retention rates. Male students had a higher average retention rate than female students at every grade level and within each ethnic group.

Students needing special services tended to have higher retention rates than other students. Students receiving special education services had a higher average retention rate than non-special education students, and students with limited English proficiency had a higher average retention rate than other students. In addition, students identified as economically disadvantaged had a disproportionately higher average retention rate than other students.

At the district and campus levels, higher retention rates were generally observed in urban community settings. Rates also were higher among districts and campuses with larger percentages of minority students and lower percentages of students passing the TAAS.

Senate Bill 4, passed by the Texas Legislature in 1999, phases in new standards for student promotion at Grades 3, 5, and 8. Students at these grade levels will have three opportunities to take and pass the TAAS. The legislation requires school districts to enroll students who fail the TAAS at these grade levels in a program of accelerated instruction. Grade-level retention is intended to be the avenue of last resort. Attempts to evaluate the influence of these policies in the future will benefit from an understanding of current trends in grade-level retention.

Notes on Appendix B

All Students

A cumulative total of students served in a district, during the school year. Students who dropped or migrated out of the Texas public school system after the first year were excluded from the total student count, as were students new to the system in the second year. Students who enrolled both years or graduated were included in the total student count.

Average Teacher Experience

In this category, districts are grouped into four subcategories with approximately equal numbers of districts in each. Weighted averages are obtained by multiplying each teacher's FTE count by years of experience. These amounts, when summed for all teachers within a district and divided by the total teacher FTE count within that respective district, result in the average years of teacher experience.

Average Teacher Salary

In this category, districts are grouped into four subcategories with approximately equal numbers of districts in each. Average teacher salary is calculated as the total salary of teachers divided by the total FTE count of teachers. The total salary amount is for regular duties only and does not include pay for any supplemental duties.

Cost of Education Index

The Cost of Education Index (CEI) reflects geographic variations in costs beyond the control of school districts. The index currently in use was first implemented in 1991-92. The CEI has a minimum value of 1.0 and a maximum of 1.20. This category divides districts into five groups with approximately equal numbers of districts in each.

District Type

Districts are classified on a scale ranging from major urban to rural. The charter school districts are in a separate subcategory. Factors such as size, growth rates, and proximity to urban areas are used to determine the appropriate group. The groups are:

Major Urban. The largest school districts in the state which serve the six metropolitan areas of Houston, Dallas, San Antonio, Fort Worth, Austin, and El Paso. A district is designated major urban if it is the largest in counties with populations of 650,000 or over, and there are greater than 35% low-income students in the school district. Or, if not the largest district in the county, the number of students in membership is 75% of the largest district and there are more than 35% low-income students in the district.

Major Suburban. Other school districts in and around the major urban areas. A district is major suburban if it is contiguous to a major urban district and the number of students in membership is at least 3% of the major urban district. If a district is not

contiguous to a major urban area, then an enrollment of 15% of the major urban district or an enrollment of at least 4,500 is required to be classified as a major suburban area.

Other Central City. The major school districts in other large Texas cities. If the district is not contiguous to one of the major urban districts but the county population is between 100,000 and 650,000 and it is the largest district in the county or its population is 75% of the largest district then the district is designated as other central city.

Other Central City Suburban. Other school districts in and around the other large, but not major, Texas cities. If the district is in a county between 100,000 and 650,000 population and the number of students in membership is at least 15% of the largest district in the county then it is designated central city suburban. If a district is contiguous to a central city district, its population is greater than 3% of that district's, and the number of students in membership is greater than the corresponding median figure for the state, it is also central city suburban.

Independent Town. If the district is the largest in a county having a population of 25,000 to 100,000, or the number of students in membership is greater than 75% of the largest district, the district is considered an independent town.

Non-Metro: Fast Growing. The school districts that fail to be in any of the above subcategories and that exhibit a five-year growth rate of at least 20 percent. These districts must have at least 300 students in membership.

Non-Metro: Stable. The school districts that fail to be in any of the above subcategories, yet the number of students in membership exceeds the state median of 817.

Rural. The school districts that fail all of the above tests for placement into a subcategory. These districts either have a growth rate less than 20 percent and the number of students in membership is between 300 and the state median of 817, or the number of students in membership is less than 300.

Charter Schools. The 61 open-enrollment schools granted a charter by the State Board of Education for operation during 1998-99. Open-enrollment charter schools operate in a facility of a commercial or nonprofit entity or a school district.

Education Service Center Regions

The state is divided into 20 geographic regions, each served by an Education Service Center (ESC). The ESC region reflected in this category is the region from which the district receives services, not the geographically assigned ESC region. For the vast majority of districts, these are the same.

Enrollment

Districts are grouped by size into nine subcategories based on their number of students in membership. This is the total number of students in membership in the district on a day in late October of each year. It does not include students who are served by the district but are not in membership in the serving district.

Highest Property Value Category

Currently, the Comptroller's Property Tax Division (CPTD) classifies property into multiple subcategories based on how

the property is used. These subcategories are aggregated into four classifications as follows:

- Residential: Single-family and multi-family residential, and residential inventory
- Land: Vacant lots, and rural real (taxable)
- Oil and Gas: Oil, gas, and minerals
- Business: Commercial and industrial real, commercial and industrial personal, and utilities

The one subcategory of these four which has the greatest total property value for a district determines in which category the district is placed. The six special statutory and 61 charter school districts form a separate group because they have no taxable property wealth.

Maintenance and Operations Effective Tax Rates

Districts are grouped into four tax effort subcategories, or quartiles, with approximately equal numbers of districts in each. This category shows the maintenance and operation (M&O) effective tax rate, which is determined by dividing the last completed calendar year's M&O levy amount by that year's CPTD total taxable property value. The M&O levy includes money generated by districts for equalizing wealth. The six special statutory and 61 charter school districts form a separate group in both categories because they do not levy property taxes.

Number Retained

To determine the number of students retained in grade, fall enrollment data were compared to attendance in the final, six-week period of the previous school year. Students enrolled in the same grade in both years were counted as retained.

Operating Cost per Student

Operating costs are the sum of all expenditures budgeted for the operation of the district, for all funds which are reported. The operating expenditures are a subset of the total expenditures; they do not include debt service, capital outlay, or ancillary services expenditures. Per student amounts are the current school year expenditures divided by the current number of students. Districts are grouped into five subcategories with approximately equal numbers of districts in each. The source for budgeted expenditures is the fall submission of the Public Education Information Management System (PEIMS).

Percent African American, Hispanic, and Minority Students

In these categories, districts are grouped according to the ethnic composition of their student populations, as reported on PEIMS. Minority percent is calculated as the sum of all non-white populations expressed as a percent of the total. The non-white populations include Native American or Alaska Native; Asian or Pacific Islander; African American, not of Hispanic origin; and Hispanic. Each of the three categories has six subgroups with the particular population ranging from "under 5%" to "50 percent and over."

Percent Economically Disadvantaged (Low Income) Students

Percent low income is the number of students reported as economically disadvantaged on PEIMS, expressed as a percent of the total number of students. Districts report students as economically disadvantaged if they meet any of the following conditions:

- a. eligible for free or reduced-price meals under the National School Lunch and Child Nutrition Program;
- b. from a family with an annual income at or below the federal poverty line;
- c. eligible for AFDC or other public assistance;
- d. recipients of a Pell Grant or comparable state program of need-based financial assistance;
- e. eligible for programs assisted under Title II of the Job Training Partnership Act.

Districts are grouped into six subgroups ranging from "under 20%" to "80% and over."

Percent Minority Teachers

In this category, districts are grouped according to the minority composition of their teacher populations, as reported on PEIMS. Minority percent is calculated as the sum of all non-white teacher FTEs expressed as a percent of total teacher FTEs. The category has six groupings with the minority population ranging from "under 5%" to "50% and over."

Percent of Teachers with Advanced Degrees

In this category, districts are grouped into four subcategories with approximately equal numbers of districts in each. The percent of teachers with an advanced degree is calculated as the FTE count of teachers with a master's degree or doctorate divided by the FTE count for all teachers.

Property Wealth

Wealth is defined as total taxable property value divided by the total number of students and is used as an indicator of a district's ability to raise local funds on a per pupil basis. The property value used is total taxable value for the last completed calendar year, i.e. 1998, as determined by the Comptroller's Property Tax Division (CPTD). The total number of students is for the current school year, i.e. 1998-99. The first wealth grouping classifies districts into ten subcategories with approximately equal numbers of districts in each, called deciles. The second grouping simply shows districts above and below state average wealth. The third wealth grouping classifies districts into 20 subcategories with approximately equal numbers of students in each. The six special statutory and 61 charter school districts form a separate group in all three categories because they have no taxable property wealth.

Pupil Change: 97/98 – 98/99

This category looks at the growth or decline in student population over a one-year period. Districts where the total number of students declined represent one grouping, while the remaining groups show one year growth rate ranging from "0%-3%" to "10% and over."

Retention Rate

The retention rate was calculated by dividing the number of students retained by the total student count. Through the 1997-98 school year, the retention calculations included only students who were enrolled on the last Friday in October. Beginning in 1998-99, the retention calculations for Grades 7-12 included all students enrolled at any time during the fall.

SAT I/ACT: Percent Scoring at or Above Criterion

Districts are grouped into five subcategories based on the number of students who scored at or above the criterion score for either the ACT or SAT I. The number of examinees meeting the criterion is divided by the number of examinees. A

sixth subcategory is for those districts that have no test takers. The criterion score is 1110 for the SAT I and 24 for the ACT.

SAT I/ACT: Percent Taking

Districts are grouped into three subcategories based on the number of eligible students who were administered either the SAT I or ACT, or both. The number of test-takers taking one or both tests is divided by the number of non-special education graduates. A fourth subcategory is for those districts that have special education graduates only.

Small/Sparse Adjustment

Districts are grouped into four small/sparse subcategories, or quartiles, with approximately equal numbers of districts in each. The category shows the amount of small/sparse adjustment as a percent of the total adjusted basic allotment amount. A fifth subcategory contains all districts receiving no small/sparse adjustment. This small/sparse percentage is a measure of the extent to which state funding is adjusted to compensate for small and/or sparsely populated districts.

Student Density

Many years ago, the square miles in a school district were determined through a joint effort by the State Property Tax Board, now the CPTD, the Texas Education Agency, and the Texas Water Commission. School district maps provided by school districts to the CPTD were digitized by the Water Commission and acreage was determined. Density is the number of students per square mile. Density groups range from "fewer than five students per square mile" to "100 or more students per square mile." The six special statutory and 61 charter school districts form a separate group because mileage information is not available for them.

TAAS: Percent Passing All Tests Taken

For grades 3-8 and 10, the total number of students who passed all sections taken is expressed as a percentage of the total number of students taking one or more tests. Districts are grouped into five subcategories with the percent passing ranging from "under 72.9%" to "88.4% and over." These percentages exclude performance on Science and Social Studies in grade 8, as well as Spanish TAAS in grades 5 & 6, and grade 4 Writing. Furthermore, these percentages include only those students enrolled in the district in October of the school year. These are the results used for accountability purposes. A sixth subcategory refers to districts not administering the test.

Total Effective Tax Rates

Districts are grouped into four tax effort subcategories, or quartiles, with approximately equal numbers of districts in each. This category shows the total effective tax rate, which is determined by dividing the last completed calendar year's total levy amount by that year's CPTD total taxable property value. The six special statutory and 61 charter school districts are in a separate subcategory because they do not levy property taxes.

Notes on Appendix C

Note. All data about teachers, campus budgets, and students is from the fall submission of the Public Education Information Management System (PEIMS). College admissions and TAAS information are provided to the TEA by the test contractors. All data is for the 1998-99 school year with the exception of college admissions and dropout data which lag one year behind.

All Students

A cumulative total of students served at the campus during the school year. Students who dropped or migrated out of the Texas public school system after the first year were excluded from the total student count, as were students new to the system in the second year. Students who enrolled both years or graduated were included in the total student count.

Average Dropout Rate (97-98)

For grades 7-12, the total number of dropouts expressed as a percentage of the total number of students in attendance at any time during the school year. Campuses are grouped into four subcategories with ranges based on criteria used in the accountability rating system. See "Campus Accountability Rating" below. The fifth subcategory, "Not Applicable," refers to elementary grade level campuses.

Average Student/Teacher Ratio

In this category, campuses are grouped into six subcategories with approximately equal numbers of campuses in the first five. The sixth subcategory, "Not Applicable," pertains to campuses reporting enrollment but no teachers. Average student/teacher ratio is obtained by dividing the total number of students in membership by the total teacher FTE count.

Average Teacher Experience

In this category, campuses are grouped into six subcategories with approximately equal numbers of campuses in the first five. The sixth subcategory, "Not Applicable," pertains to campuses reporting enrollment but no teachers. Weighted averages are obtained by multiplying each teacher's FTE count by years of experience. These amounts, when summed for all teachers within a campus and divided by the total teacher FTE count within that respective campus, result in the average years of teacher experience.

Average Teacher Salary

In this category, campuses are grouped into six subcategories with approximately equal numbers of campuses in the first five. The sixth subcategory, "Not Applicable," pertains to campuses reporting enrollment but no teachers. Average teacher salary is calculated as the total salary of teachers divided by the total FTE count of teachers. The total salary amount is for regular duties only and does not include pay for any supplemental duties.

Campus Accountability Rating

This category refers to the campus rating based on the 1999 accountability system. A campus's rating is based on performance on the Spring 1999 TAAS, the 1997-98 dropout rate, and the 1997-98 attendance rate. The four levels of accountability ratings for campuses and the *general* conditions of each of the criteria for 1999 are as shown:

Rating	TAAS	Dropout Rate	Attendance
Exemplary	>= 90%	<= 1.0%	>= 94%
Recognized	>= 80%	<= 3.5%	>= 94%
Acceptable	>= 45%	<= 6.0%	>= 94%
Low-Performing	< 45%	> 6.0%	>= 94%

Some campuses are shown as "Acceptable: DI," "Alternative Education," "Not Rated," or "Not Applicable." Campuses classified as "Acceptable: DI" are the result of serious errors in data reporting that affected one or more of the base indicators used for determining accountability ratings. The errors are of such magnitude that the results were deemed to be unsuitable for ratings purposes. "Alternative Education" campuses are evaluated separately and are categorized as either *AE: Acceptable*, *AE: Needs Peer Review* or *AE: Not Rated*. "Not Rated" campuses include first-year charter schools, or the pre-kindergarten, kindergarten, or early education centers that are not rated because standardized test data are not available at those grade levels. "Not Applicable" campuses are those with insufficient data to evaluate.

For a more detailed explanation of the accountability system, see the *1999 Accountability Manual*.

Campus Type

Campuses are classified into four types according to the range of grades offered. Total membership information as reported to the TEA is used to construct grade ranges. The type classifications are:

1. Elementary Schools
2. Middle and Junior High Schools
3. High Schools
4. K - 12 Schools

For a more extensive review of grade ranges, please refer to the grid in Exhibit B in the appendix of the Texas Education Agency (TEA) *Snapshot* publication, which presents the possible combinations of low and high grades for each of the campus types.

Enrollment Groupings

Campuses are grouped by size into five subcategories based on their number of students in membership. This is the total number of public school students who were reported in membership on a day in late October of each year. It does not include students who are served by the campus, but are not in membership there.

Instructional Cost Per Pupil

Instructional costs are the sum of expenditures budgeted for all activities dealing directly with the instruction of pupils, including instruction through the use of computers, and managing, directing, supervising, and providing leadership for staff who provide instructional services. The per pupil amounts

are the current school year budgeted expenditures divided by the current number of students in membership. Campuses are grouped into six subcategories with approximately equal numbers of campuses in the first five. The sixth subcategory refers to campuses with no reported instructional costs.

Number Retained

To determine the number of students retained in grade, fall enrollment data were compared to attendance in the final, six-week period of the previous school year. Students enrolled in the same grade in both years were counted as retained.

Percent Economically Disadvantaged (Low Income) Pupils

Percent low income is the number of students reported as economically disadvantaged on PEIMS, expressed as a percent of the total number of students. Districts report students as economically disadvantaged if they meet any of the following conditions:

- eligible for free or reduced-price meals under the National School Lunch and Child Nutrition Program;
- from a family with an annual income at or below the federal poverty line;
- eligible for AFDC or other public assistance;
- recipients of a Pell Grant or comparable state program of need-based financial assistance;
- eligible for programs assisted under Title II of the Job Training Partnership Act.

Campuses are grouped into one of five subcategories with the percent economically disadvantaged ranging from "under 22.4%" to "80.2% and over."

Percent Minority, African American, and Hispanic Pupils

In these categories, campuses are grouped according to the ethnic composition of their student populations, as reported on PEIMS. Minority percent is calculated as the sum of all non-white populations expressed as a percent of the total. The non-white populations include Native American or Alaska Native; Asian or Pacific Islander; African American, not of Hispanic origin; and Hispanic. Each of the three categories has five subcategories with the following population ranges:

Category	Lowest Subcategory	Highest Subcategory
Minority Percent	Less than 20%	85% and over
African American Percent	Less than 1%	20% and over
Hispanic Percent	Less than 6%	60% and over

Percent Minority, African American, and Hispanic Teachers

In these categories, campuses are grouped according to the ethnic composition of their teacher populations, as reported on PEIMS. Minority percent is calculated as the sum of all non-white teacher FTEs expressed as a percent of total teacher FTEs. The non-white populations include Native American or Alaska Native; Asian or Pacific Islander; African American, not of Hispanic origin; and Hispanic. Only Minority percent, African American percent and Hispanic percent are presented as separate categories. Each of the three categories has five subcategories with the following population ranges:

Category	Lowest Subcategory	Highest Subcategory
Minority Percent	None	41.2% and over
African American Percent	None	17.3% and over
Hispanic Percent	None	33.3% and over

Percent of Teachers with Advanced Degrees

In this category, campuses are grouped into six subcategories with approximately equal numbers of campuses in the first five. The sixth subcategory refers to campuses with unreported teacher FTEs or campuses with no teachers with advanced degrees. The percent of teachers with an advanced degree is calculated as the FTE count of teachers with a master's degree or doctorate divided by the FTE count for all teachers.

Pupil Change: 97/98-98/99

This category looks at the growth or decline in student population over a one-year period. Campuses where the total number of students declined represent the first two groupings, while the next three groups show one year growth rate ranging from "-1.5% to 1.6%" to "6.0% and over." The last grouping, "New Campuses," refers to campuses reporting students in the fall of 1998 for the first time.

Retention Rate

The retention rate was calculated by dividing the number of students retained by the total student count. Through the 1997-98 school year, the retention calculations included only students who were enrolled on the last Friday in October. Beginning in 1998-99, the retention calculations for Grades 7-12 included all students enrolled at any time during the fall.

SAT I/ACT: Percent Scoring at or Above Criterion (97-98)

Campuses are grouped into five subcategories based on the number of students who scored at or above the criterion score for either the ACT or SAT I (1110 for the SAT I; 24 for the ACT). The number of examinees meeting the criterion is divided by the number of examinees. A sixth subcategory is for those campuses that have no test takers.

SAT I/ACT: Percent Taking (97-98)

Campuses are grouped into five subcategories based on the number of students who took either the SAT I, the ACT, or both. The number of test-takers taking one or both tests is divided by the number of non-special education graduates. A sixth subcategory is for those campuses that have special education graduates only.

TAAS: Percent Passing All Tests Taken

For grades 3-8 and 10, the total number of students who passed all sections taken is expressed as a percentage of the total number of students taking one or more tests. Campuses are grouped into five subcategories with the percent passing ranging from "under 65.8%" to "89.3% and over." These percentages exclude performance on Science and Social Studies in grade 8, as well as Spanish TAAS in grades 5 & 6, and grade 4 Writing. Furthermore, these percentages include only those students enrolled in the district in October of the school year. These are the results used for accountability purposes. A sixth subcategory refers to campuses with no students tested on the TAAS.

Compliance Statement

Title VI, Civil Rights Act of 1964, the Modified Court Order, Civil Action 5281, Federal District Court, Eastern District of Texas, Tyler Division.

Reviews of local education agencies pertaining to compliance with Title VI Civil Rights Act of 1964 and with specific requirements of the Modified Court Order, Civil Action No. 5281, Federal District Court, Eastern District of Texas, Tyler Division are conducted periodically by staff representatives of the Texas Education Agency. These reviews cover at least the following policies and practices:

1. acceptance policies on student transfers from other school districts;
2. operation of school bus routes or runs on a nonsegregated basis;
3. nondiscrimination in extracurricular activities and the use of school facilities;
4. nondiscriminatory practices in the hiring, assigning, promoting, paying, demoting, reassigning, or dismissing of faculty and staff members who work with children;
5. enrollment and assignment of students without discrimination on the basis of race, color, or national origin;
6. nondiscriminatory practices relating to the use of a student's first language; and
7. evidence of published procedures for hearing complaints and grievances.

In addition to conducting reviews, the Texas Education Agency staff representatives check complaints of discrimination made by a citizen or citizens residing in a school district where it is alleged discriminatory practices have occurred or are occurring.

Where a violation of Title VI of the Civil Rights Act is found, the findings are reported to the Office for Civil Rights, U.S. Department of Education.

If there is a direct violation of the Court Order in Civil Action No. 5281 that cannot be cleared through negotiation, the sanctions required by the Court Order are applied.

Title VII, Civil Rights Act of 1964 as Amended by the Equal Employment Opportunity Act of 1972; Executive Orders 11246 and 11375; Equal Pay Act of 1964; Title IX, Education Amendments; Rehabilitation Act of 1973 as Amended; 1974 Amendments to the Wage-Hour Law Expanding the Age Discrimination in Employment Act of 1967; Vietnam Era Veterans Readjustment Assistance Act of 1972 as Amended; Immigration Reform and Control Act of 1986; Americans With Disabilities Act of 1990; and the Civil Rights Act of 1991.

The Texas Education Agency shall comply fully with the nondiscrimination provisions of all federal and state laws, rules, and regulations by assuring that no person shall be excluded from consideration for recruitment, selection, appointment, training, promotion, retention, or any other personnel action, or be denied any benefits or participation in any educational programs or activities which it operates on the grounds of race, religion, color, national origin, sex, disability, age, or veteran status (except where age, sex, or disability constitutes a bona fide occupational qualification necessary to proper and efficient administration). The Texas Education Agency is an Equal Opportunity/Affirmative Action employer.

REPRODUCTION RELEASE

(Specific Document)

NOTE: Two Copies are provided
TEA Publication No. GE1-601-07

I. DOCUMENT IDENTIFICATION:

Title: <u>1998-9 GRADE-1 Level Retention in Texas Public Schools</u>	
Author(s):	<u>Use corporate entry</u>
Corporate Source:	<u>Texas Education Agency-Austin*</u>
Publication Date:	<u>5-01</u>

II. REPRODUCTION RELEASE: *This is the State Department of Education for Texas. Please use this corporate entry without personal author.

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, *Resources in Education* (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic media, and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following three options and sign at the bottom of the page.

The sample sticker shown below will be affixed to all Level 1 documents

The sample sticker shown below will be affixed to all Level 2A documents

The sample sticker shown below will be affixed to all Level 2B documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL HAS BEEN GRANTED BY
